

## FOR IMMEDIATE RELEASE

### BESSEY® - Industrial Bench Vise

**July 1, 2013 - The most recent vise addition to the BESSEY line-up is a forged vise that is made to supremely high tool standards – Unbreakable under normal usage.**

The moveable jaw, stationary jaw and base are all 90,000 psi forged steel that is fabricated in European facilities to very high standards. Even the anvil and jaw faces are precision ground and then induction heated for extra durability.

The 4, 5 and 6 In. industrial vises in this series also offer other very valuable real-world features. The 360 degree swivel base is standard and offers great flexibility in the workshop while the pipe jaws are welded in place for secure clamping of odd shapes and pipe. Additionally, there are adjustment screws that allow one to adjust the movement of the jaws in that rare case where they might not be completely parallel.

The forged industrial vises series from BESSEY is a welcome addition to the family of bench and consumer vises as it offers the highest level of quality and durability.

BESSEY® has been a market leader in clamping since 1936. If you know clamps, you know BESSEY®. You know our reputation for quality and reliability; you know we're 130 years of German engineering backed by the strength of our product and our reputation. BESSEY®. Simply better.
