

## FOR IMMEDIATE RELEASE

### BESSEY® NEW Traditional Pipe Clamps PC-2

While it may sound like an oxymoron, the idea of **NEW** and **Traditional** do go well together when considering the new **BESSEY® PC12-2** and **PC34-2** Pipe Clamps. **BESSEY®** has taken the lead from their prior version of the **PC12** (1/2 In. pipe clamp) and **PC34** (3/4 In. pipe clamp) and improved upon them in nearly every way.

This new pipe clamp is more elevated (from the tabletop) than most versions to reduce wear-and-tear on fingers that would rap the table top with older styles of pipe clamps. It also boasts a large clamping surface area with black pads that are gentle on wooden surfaces. Finally, the handle has its own special ‘twist’ for those that may want speedy tightening or, who may have some issues with their wrists or forearm strength --- there is a hexagonal head for tightening with a wrench. It should be noted that this is only to facilitate tightening....not to augment the force applied.

The New Traditional **BESSEY®** pipe clamps (PC12-2, PC34-2) are priced aggressively and are a pleasant upgrade on what is often an over-looked tool group.

**BESSEY®** has been a market leader in clamping since 1952. If you know clamps, you know **BESSEY®**. You know our reputation for quality and reliability; you know we’re more than 125 years of German engineering backed by the strength of our product and our reputation.

**BESSEY®**. Simply better.
