

FOR IMMEDIATE RELEASE

BESSEY® introduces the new KombiKlamp™

A new degree of versatility ... clamps or spread with the Variable Angle Device!

April 1, 2008 - The KombiKlamp™ adds a new degree of versatility to the original BESSEY® welding clamps. With the addition of the Variable Angle Device on the fixed jaw, you can easily clamp (or spread) irregular, flat and odd shapes, providing solutions for a wide variety of applications with just one clamp ... what a great idea!

With a throat depth of 4 3/4" and an opening of 12", the KombiKlamp™ delivers 2600 lbs. of clamping force and has a load limit of 3000 lbs. The removable screw allows for a quick and easy conversion to a spreader without having to use specialized tools and the ergonomic BESSEY® Grip on the t-handle offers greater comfort with less hand fatigue. Finally, the KombiKlamp™ comes standard with a replaceable pressure pad that can be quickly changed without tools. This German manufactured product is available at an aggressive price and with this many features ... BESSEY® is confident of its success.

BESSEY® has been a market leader in clamps since 1936. As the largest clamp manufacturer in the world, BESSEY® distributes over 1300 different clamping tools in 90 countries worldwide. Under its Erdi brand, BESSEY® is also recognized as a trade leader in cutting tools and snips throughout Western Europe and now offers that technology to the North American market through BESSEY® Tools North America.
