GearKlamp: GK Series

GearKlamp: GK Series

Simply better.

- ❑ The first of its kind provides a unique clamping solution for difficult set-ups in tight spaces.
- ❑ Simplifies tricky clamping applications
- ❑ Quick-shift button on the arm for broad movements of the operating jaw.
- ❑ Once the operating jaw is in position the “around-the-rail” handle is twisted clockwise to tighten the clamp.
- ❑ To loosen the clamp, twist the clamp handle counterclockwise.
- ❑ 450 lbs of clamping force
- ❑ 4 clamping capacities (6,12,18 & 24”) with 2 3/8 inch throat depth

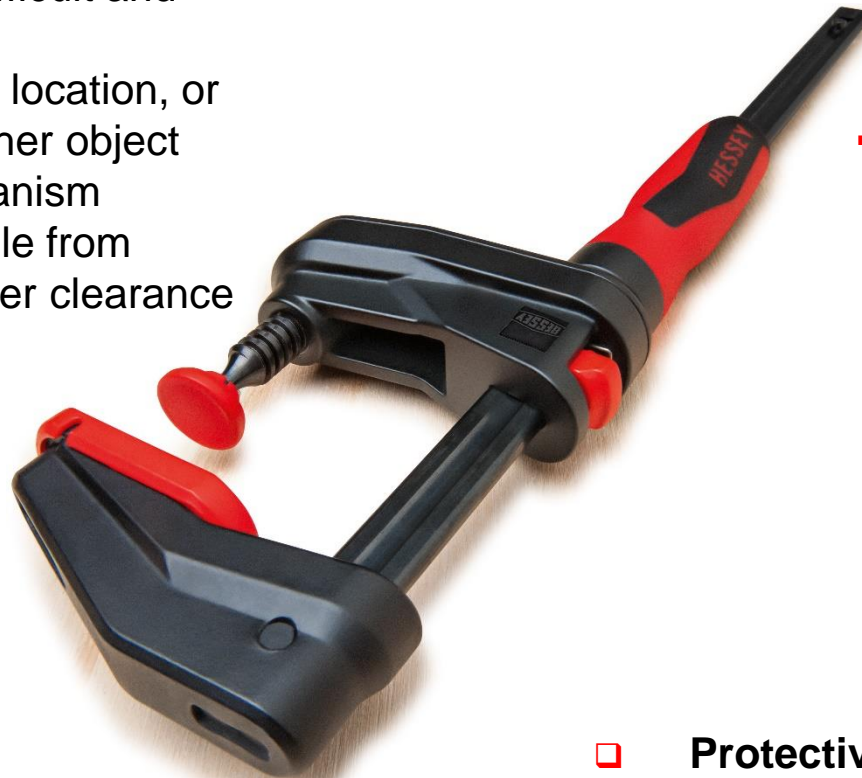

GearKlamp: GK Series

Simply better.

□ Unique clamping solution

- Reaches into difficult and awkward spots
- Use in cramped location, or up against another object
- Patented mechanism separates spindle from handle for greater clearance

□ Durable construction

- Tempered steel, profiled rail for durability
- Fiberglass reinforced polyamide housing protects from dust and debris

□ Easy to Use

- Quick adjust button for big movements on the bar
- Quick turn handle for comfortable, strong clamping

□ Protective caps

- Removable pad reveals grooved section to clamp oddly shaped objects
- Prevents marring of wood
