Metalworking: Traditional all-steel bar clamps

Metalworking: Traditional all-steel bar clamps

Features:

- 1) Patented rail profile gives enhanced clamping force & increased stability. More clamping force per turn of the spindle.
- 2) High performance BESSEY® MorPad
- 3) Smooth-running heat treated spindle with large ACME type thread - faster clamping with less effort. Extra hard surface resists weld spatter. Strong sliding t-bar handle size engineered to load capacity.
- 4) Patented sliding arm design. New U-shape gives greater stability & more efficient transfer of force.

Metalworking: Traditional all-steel bar clamps

Light Duty – MMS Series

- ❑ Capacities available: 4", 8" & 12"
- ❑ Throat Depth = 2-1/4"
- ❑ Clamping Force rating 400 lbs

Medium Duty SGL series

- ❑ Capacities available: 8", 12", 18" & 24"
- ❑ Throat Depth = 4-3/4"
- ❑ Clamping Force rating 1800 lbs

Metalworking: Traditional all-steel bar clamps

Regular Duty SQ series

- ❑ Capacities available: 8" to 60"
- ❑ Throat Depth = 5-1/2"
- ❑ Clamping Force rating 2660 lbs

Heavy Duty STB series

- ❑ Large sturdy T-handle
- ❑ Capacities available: 12", 18", 24", 36", 48" & 60"
- ❑ Throat Depth = 7" Clamping Force rating 4880 lbs

SGL, SQ & STB models are built with BESSEY® original classic profile rails

Metalworking: Traditional all-steel bar clamps

classiX® light duty, GS series

- ❑ Capacity (opening): From 4" - 24"
- ❑ Clamping forces: From 550 lbs - 1200 lbs
- ❑ Throat depth: From 3-1/8" – 5-1/2"
- ❑ Classic profiled rail

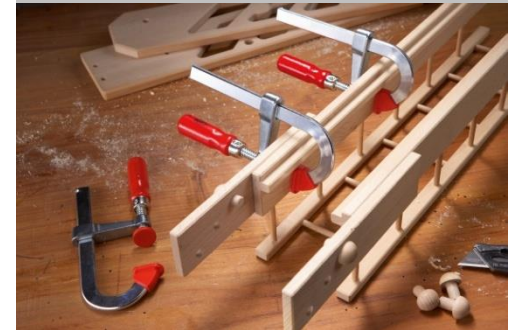

classiX® medium duty, GSL series

- ❑ Capacity (opening): 12", 24"
- ❑ Clamping force: 1880 lbs
- ❑ Throat depth: 4-3/4"
- ❑ Classic profiled rail
- ❑ Simplified heavy duty Morpad

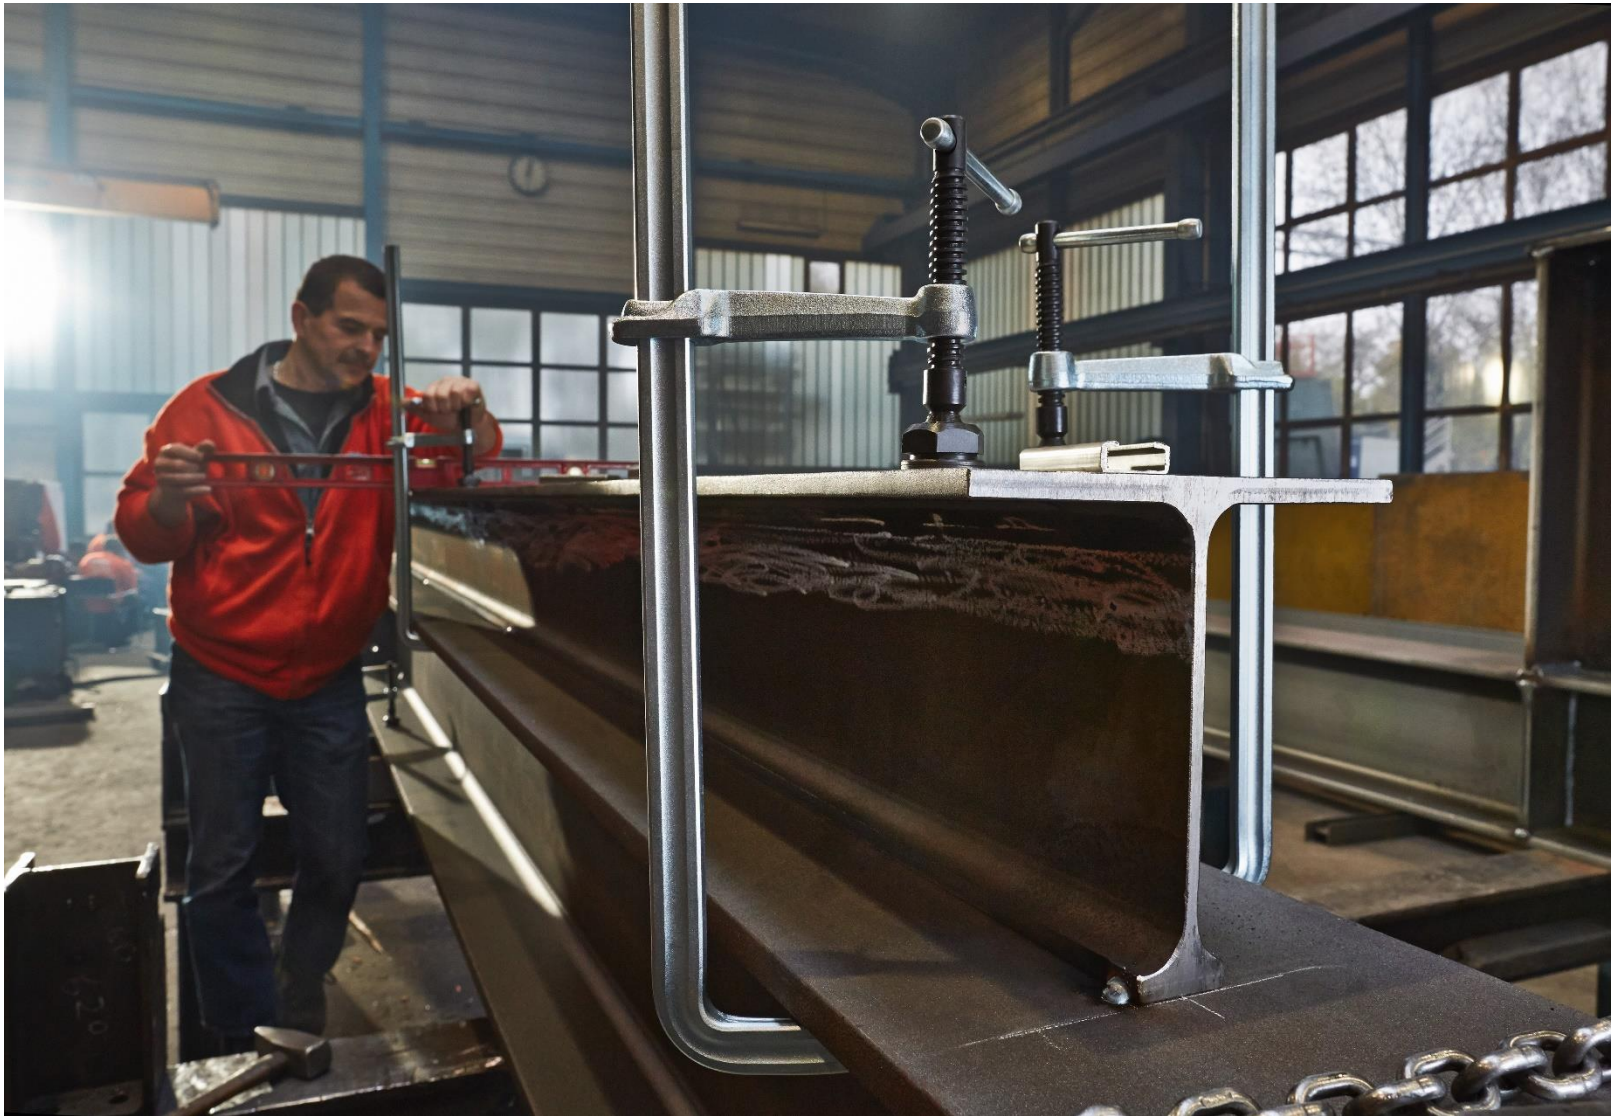

classiX® regular duty, GSM series

- ❑ Capacity (opening): From 7-1/2" - 24"
- ❑ Clamping forces: 2660 lbs
- ❑ Throat depth: From 4-3/4" – 5-1/2"
- ❑ Classic profiled rail
- ❑ Simplified heavy duty Morpad

Metalworking: Traditional all-steel bar clamps
