

Trigger clamps

One-handed clamps

Simply better.

NEW

EHK Trigger Clamp

What separates the BESSEY® trigger clamp from the rest is that it has been engineered from the start to offer a clean design, comfortable handles, up to 600 lbs. of potential clamping force and the ability to quickly transform from clamping to spreading. The transition from clamping to spreading requires no tools. All that is required is a quick push of the locking mechanism to disengage the fixed jaw, move it to the opposite end of the rail and re-engage.

1 Powerful technology, robust construction

One-handed clamping or spreading of work pieces with up to 600 lbs. of force.

2 No tools required

No tools required to easily convert from clamping to spreading; push button jaw release.

3 Soft touch pads

Soft-touch jaw pads eliminate marring of work, and they're removable too. Steel bar for the strength you expect from BESSEY.

4 Ergonomic composite handle

Ergonomically shaped composite handle with trigger makes it easy to achieve maximum clamping force.

Trigger clamp bar clamps, EHK series

BESSEY's already broad range of one hand clamps has now grown farther to offer a full line of pistol-grip trigger clamps. A robust construction allows a range of clamping force from 40 lbs to 600 lbs.
