BESSEY Tool

**Press Release 02/2020 – New from BESSEY:
All-steel screw clamp GZ with swivel handle**

90° swiveled in a flash for more flexibility

BESSEY is expanding its extensive range of all-steel screw clamps with an exciting alternative. The new clamp with swivel handle is particularly impressive due to its ergonomic handling and rapid power build-up.

Powerful, fast and comfortable

For example, the new all-steel screw clamp GZ-KG has a special 2-component plastic handle that offers further benefits in addition to ergonomic comfort. It can be swiveled by 90°, which provides additional leverage when tightening – and therefore less effort for the user. In addition, the handle can be turned 360° when swiveled. This means that the user can continue to tighten in any situation during the clamping process, as is the case with other competitor models. In addition, clamping forces of up to 5,000 N can be achieved much faster. The well thought-out BESSEY innovation is also an advantage when the clamping process is tight. This is because the disturbing 2-component plastic handle can be simply swiveled away in places that are difficult to access.

In proven BESSEY all-steel quality

The other components of the new GZ version also stand out with the usual high BESSEY quality: Original BESSEY all-steel screw clamps offer high stability and flexibility at low weight. The fixed clamp forged from a single piece with moulded pressure plate is hardened and galvanised. This allows the special resilient property of the all-steel screw clamp to be achieved. The benefits: For one, this allows the pressure to be perfectly matched to the requirements of the workpiece. On the other hand, all-steel screw clamps are less sensitive to vibrations, because they can be partially absorbed. The clamps therefore do not need to be retightened so quickly. As with all other original BESSEY all-steel screw clamps, the pressure plate can be changed without tools.

The new all-steel screw clamp with swivel handle is available in 5 variants with opening widths between 250 and 600 mm, each with 120 mm throat depth.

*At BESSEY, we have a long tradition of producing **innovative, practical product solutions**. Since the cold drawn steel plant was founded in Stuttgart in 1889, the Bietigheim-Bissingen based company continues to raise the bar in clamping and cutting technology. Currently offering more than 1,600 products, BESSEY has a specific solution for practically every application. Our focus is on precision and durability, convenience and safety. "To stop improving is to stop being good." This was the motto of company founder Max Bessey and it remains our guiding principle today – in all that we do and produce. This means that we are constantly developing new products and improving existing ones to make the user's life easier, on the basis of innovative ideas. Such innovations are worthwhile.*
